II. INTRODUCTION

Regional Services and Education Center (RSEC) located in Amherst, NH, is a collaborative organization of three SAUs, 39, 40, and 41, comprised of seven member school districts: Amherst, Brookline, Hollis, Hollis-Brookline Cooperative, Milford, Mont Vernon, and Souhegan Cooperative. Currently the RSEC Board of Directors includes the superintendents from the three SAUs, four school boards members (on a rotating basis) and two community member (also rotating through the member districts.) As part of its organization, RSEC operates four schools with students attending from 38 different school districts: Longview School in Deerfield with 19 students (grades 9-12, ages 13-21), The RSEC Academy in Amherst with 41 middle and high school students (grades 5-12, ages 9-21), The Summit School also in Amherst with 18 students (grades 9-12, ages 13-21), and Sunrise Children's Center in Amherst with 7 students with educational disabilities (grades PS-K, ages 2-7).

In addition to operating the four schools, RSEC provides a number of services to the community. Child Check services are provided to some member districts screening 3 to 5 year-olds three to four times a year. Sunrise Early Intervention provides early supports and services to area families, birth to three. Evaluation services are available to member districts as well as a variety of trainings for parents and local educators.

RSEC's mission is to raise the capability of parents and schools to help all children and youth to be successful.

III. PURPOSE AND DESIGN OF THE CASE STUDY COMPLIANCE REVIEW PROCESS

The New Hampshire Department of Education (NHDOE) conducted a Special Education Program Approval Visit to Regional Services and Education Center on March 26 and 27, 2012 for the purpose of reviewing the present status of programs and services made available to children and youth with educational disabilities. Program Approval Visits are conducted using a Case Study Model that is a focused review. This focused review permits the NHDOE to leverage its impact for change and improvement within private special education schools statewide, by focusing the attention of all educators on the following three areas of critical importance in the provision of FAPE for students with disabilities.

- Access to the General Curriculum
- Transition
- Behavior Strategies and Discipline

As part of this compliance review, students were randomly selected by the NHDOE prior to the visit, and staff was asked to present these students' case studies at the visit to determine compliance with state and federal special education rules and regulations.

Other activities related to this NHDOE Case Study Compliance Visit included the review of:

- All application materials submitted
- Status of corrective actions since the last NHDOE Special Education Program Approval Visit
- Personnel credentials for special education staff (verified by NHDOE)
- Program descriptions and NHSEIS verification reports
- All data collected during the visit
- Any new or changed special education programs seeking approval from the NHDOE (Not applicable)

The New Hampshire Department of Education provided a visiting team of professional educators to work collaboratively with staff in each of the schools in conducting the Case Study Compliance Review and the varied data collection activities. Throughout the entire review process, the visiting team worked in collaboration with the staff of the RSEC schools. Their professionalism, active involvement in the process and cooperation were greatly appreciated and well recognized.

Evidence of the work conducted and results related to student outcomes were gathered throughout the process, guided by the materials and templates provided by the NHDOE, Bureau of Special Education. Examples of evidence included student individual education programs (IEPs), progress reports, samples of student work, grades, extracurricular involvement, permanent records, curriculum, etc. Input was gathered from key constituents, including interviews with professional staff, parents, administrators, and in some cases the students. In addition, classroom observations were conducted for each of the case studies being reviewed. The collective data were summarized by the visiting and building level teams. The summaries, included in the following pages, outline identified areas of strength and areas needing improvement for each school reviewed.

IV. STATUS OF PREVIOUS NHDOE SPECIAL EDUCATION PROGRAM APPROVAL REPORT AND CORRECTIVE ACTIONS

Based on review of the June 29, 2007 (revised date), NHDOE Special Education Program Approval Report, the following patterns were identified as needing improvement:

Findings of Noncompliance	Status as of May 14, 2008 Corr. Action Plan	Status as of March 26, 27, 2012

MARCH 26, 27, 2012 CASE STUDY COMPLIANCE REVIEW RESULTS V.

Data collection is an important part of the NHDOE Special Education Case Study Compliance Review Process. In order to monitor whether or not special education programs are in compliance in the three focus areas, and determine any root causes of problems that may be identified through the case study process, it is essential that each case study team look deeply into the data that surrounds the three primary aspects of the Case Study Review. This process takes time, and the entire team working with the child being reviewed must be involved in collecting and analyzing the data, as well as presenting and summarizing the data with the visiting team. As such, NHDOE works with private schools to determine the number and type of case studies to be prepared and presented, and to ensure that building teams are not inundated with more data than can be fully analyzed, allowing them to reflect upon and generalize their newly found knowledge of their programs, practices, policies and procedures.

In preparation for the Case Study visit, the Technical Assistant for the NHDOE Program Approval Team worked closely with the administration and staff of each of the four schools under RSEC to randomly select seven students from preschool through grade 12 for the Case Study. Students selected represented a range of ages, grades, gender, and disabilities: Learning Disabilities, Speech/Language Disabilities, Other Health Impairment, Emotional Disturbance, and Developmental Delay. The indepth look at these individual students provided a clear picture of the overall functioning of the four RSEC schools.

LEA SURVEYS

Private schools provide necessary options to New Hampshire students with educational disabilities. Effective partnerships with LEAs are an important part of establishing and implementing successful private special education programs that improve student outcomes. By surveying LEA perceptions of current program(s), private schools can self assess these relationships and determine if there are areas in need of improvement. To this end, RSEC schools distributed the LEA Survey to the contact people in all LEAs that have students currently enrolled in the RSEC schools. The percent of returned responses is noted in each school summary.

The NHDOE Education Consultant reviewed the LEA Surveys returned to the respective RSEC schools and noted the following information:

RSEC Academy had a strong return on the surveys sent out; specific responses indicated general satisfaction with the program. Areas the RSEC Academy might want to address include communication regarding student progress and communication in general. Summit School also had a strong return on LEA surveys with generally positive feedback. Based on this feedback, Summit School could review their processes for measuring academic growth of students and their progress toward IEP goals. The way they report this growth to LEAs is suggested as an area to strengthen.

Longview School had a sound response from LEAs with no real areas of concern. LEAs mentioned their appreciation of the Longview's efforts to hold students accountable for their work and behavior as well as for their communication with parents.

Sunrise Children's Center received one response out of one survey sent out. (Currently, SCC has only one sending school LEA (two school districts) as other RSEC-member districts have developed their own preschool programs.) On that one returned survey, several issues of concern were noted: measurement of educational progress, how or if the staff is measuring academic growth, and communication with parents. These are areas SCC might want to review internally as well as with their sending districts. Areas of strength appeared to be involving parents in decision-making and scheduling meetings at times convenient to parents and sending districts.

Full results from the surveys follow:

22. I would enroll other students at the school.	13	6		1	1
——————————————————————————————————————			_		

Comments from sending school districts:

RSEC is one of the top private schools that I work with.

2. The Bow school district is very pleased with The RSEC Academy and would not hesitate to recommend or send other students to RSEC

3. The RSEC Academy provides outstanding special education services.

- 4. I have been dissatisfied with academic growth and documentation of or lack of growth. The school works with students that public schools can serve. Expectations of students are not high nor are competitive to their neighboring schools.
- 5. I have a very high regard for the RSEC Academy. In general I feel well informed re: the status of my students. However it might make sense if staff de-emphasize the narrative reports and put more attention into reporting on IEP goals and bench marks. Related services are an "add on" and are fee for service. This arrangement often leads to extra administration costs which are not recoverable in catastrophic aid, regretfully.

6. As the representative of the Nashua School District, I have found the RSEC staff, led by Janet Reed, to be very professional, with a broad knowledge of curriculum and special education regulations. They also provide a variety of transition services.

Analysis of Responses by Private School:

53% of the responses district strongly agreed 36% of the responses district agreed 4% of the responses disagreed 1% of the responses strongly disagreed 6% of the responses were no answer

The two areas that seemed to stand out were satisfaction with related services and transition to a less restrictive environment.

I feel that we will need further clarification but recognize that our related services have undergone personnel changes. Also, we contracted with an outside agency for Speech/Language last year. This caused some challenges and ultimately we chose to hire our own therapist this year.

Historically, we transition an average of 4 students out of our program each year. This is always a difficult decision and parents can be very resistant to change.

Comments from sending school districts (insert additional page if needed):

- I have great respect for the mission and staff of the Summit School. However, I do think progress reporting needs to be revamped in order to focus on progress toward IEP goals and benchmarks.
- 2. Jan and her staff have worked diligently to help 2 students with significant issues find a level of success. They have extended numerous alternative learning options to the students.
- 3. Unfamiliar with measures you use to assess progress Unfamiliar with assessment three times a year. Very satisfied with the program overall.
- 4. I feel that the Summit staff are willing to do what it takes for the students in their program. The progress written reports are a weakness. I am pleased with the placement.

Analysis of Responses by Private School:

70% of the responses district strongly agreed 23% of the responses district agreed 6% of the responses disagreed 0% of the responses strongly disagreed 1% of the responses were no answer

Eleven surveys were sent and eight were returned. Included is the break-down of responses on the following page. Districts agree or strongly agree with the educational program and also feel we have good relationships with them. Additionally they feel they would enroll other students here.

A couple areas of concern were measuring behavioral and academic growth as well as completing comprehensive progress reports that describe the student's IEP goal progress. Based on this the Summit School will begin to report quarterly progress specific to the IEP goals. This will allow staff and students an opportunity to monitor this area more often.

21. I have a good relationship with the school.	9	2			
22. I would enroll other students at the school.	9	1		1	

Comments from sending school districts: (insert additional page if needed):

- Extremely helpful even with student who has been in and out of YDC.
- 2. IEP dates need to be more closely monitored.
- Working very well for student enrolled there.

Analysis of Responses by Private School:

Relative Strengths:

- Private school team has positive expectations for students
- LEA's are satisfied with the educational program
- School communicates effectively with parents
- Meeting times are convenient for parents and LEA
- LEA's have a good relationship with the school and have met expectations

Need for Improvement:

- 9 of the 11 LEA's responding strongly agreed if the school finds a change of placement or termination is necessary, they notify the LEA and convene the IEP team to: review concerns, review/revise IEP, discuss the placement and determine if the facility can fully implement the IEP and provide FAPE. 1 LEA strongly disagreed.
- IEP dates need to be monitored more closely.

Analysis:

- Maintaining positive relationship and ongoing communication with all our LEAs (and parents) is among priorities at Longview School. We aspire to assure that all strategies, methods and resources are explored, tried when appropriate, and seek alternative possibilities when a student is struggling to make progress on IEP goals. Efforts will be made to identify shortfalls in this process. Longview will continue to make a concerted effort to assure that the process is thorough with all necessary communication.
- Case managers and the administrative assistant will explore and implement a means to more effectively document IEP due dates, reminders and follow up that due dates are met.
- Longview administration will continue to maintain a rapport with LEAs of questioning whether we are providing the expected programming for their students and what additional needs do they have or would like to see from our school and staff.

Analysis of Responses by Private School:

There are good relationships with parents concerning day-to-day items. However, they are often adversarial toward district and often are secretive and without district involvement. Have trouble with fact that over 85 percent of students ever placed have required 1:1 support.

PARENT PARTICIPATION

One of the defining features of effective schools is strong parent/community relations and open communication. Having parents as active stakeholders in the NHDOE Special Education Program Approval Process ensures broader perspectives and brings forth new ideas. In addition, including the parent perspective enhances and strengthens the teams' case study presentations, and makes for stronger school/parent relationships. As such, parent participation and input is a required part of the NHDOE Special Education Program Approval Process. In order to ensure parent participation and feedback, the NHDOE, Bureau of Special Education involves parents in a variety of aspects of the Special Education Program Approval Process. First, parents are encouraged to be active participants in the case study presentations; second, parents of the children presented in the case study process are formally interviewed; and third, the school is required to send all parents of students with disabilities a written survey with a request to respond. Below is a summary of the results of the parent survey, along with a summary of the comments/feedback provided to the visiting team during this Case Study Compliance Review.

A review of Parent Survey data by the NHDOE Education Consultant (chairperson of the visiting team) revealed a smaller percentage of returned surveys than the LEA surveys; for instance, Summit School and Longview School received only 11% return. Generally, parent feedback was favorable with the exception of two areas of frustration: lack of opportunities for students to interact with non-disabled peers and lack of opportunities for students to participate in school activities outside of the school day.

Analysis of Parent Survey Responses by Private School (RSEC Academy):

Access to General Curriculum:

75% of responses were in the completely category

13% of responses were in the partially category

4% of the responses are in the not at all category

7% of the responses were in the No Answer

Overall, results show that parents are satisfied with their child's access to the general curriculum

Transition

65% of responses were in the completely category

18% of responses were in the partially category

0% of the responses are in the not at all category

18% of the responses were in the No Answer

Overall, results show that parents are satisfied with the transition work. Many of our middle school parents are just beginning to experience the formal transition process which would account for the 18% of No Answers.

Behavior

41% of responses were in the completely category

12% of responses were in the partially category

0% of the responses are in the not at all category

47% of the responses were in the No Answer

Since the RSEC Academy is not a school for students with significant behavior challenges, these questions pose a challenge for 47% of our parents with 53% being satisfied with their involvement and our meeting their needs.

Areas of Focus

1. One area for The RSEC Academy to investigate is expanding our after school programming with non-disabled peers. Our sports teams interact with non-disabled peers but at this time we do not have non-sports oriented opportunities.

2. Gather more specific data from parents about survey response to clarify the partially satisfied answers.

Analysis of Parent Survey Responses by Private School (Sunrise Children's Center)

Relative Strengths:

ACCESS TO THE GENERAL CURRICULUM

Opportunities to interact with non-disabled peers. Parents are informed of age appropriate activities. Parents are informed about progress. Children feel safe, secure, and welcomed. A variety of information is used in developing IEPs Parents are satisfied with progress

TRANSITION:

Transition planning involves people who are important to transition.

BEHAVIOR STRATEGIES AND DISCIPLINE:

Satisfied with behavioral supports

OTHER:

Parents fully participate in decisions. Parents receive copy of parental rights.

TARGET AREAS OF FOCUS FOR ACTION PLAN:

- 1. Continue to provide resources for parenting classes, counseling, and support groups for parents.
- 2. Continue to provide information for out-of-school and enrichment activities for preschoolers.

SUMMARY FROM THE THREE FOCUS AREAS OF THE CASE STUDY COMPLIANCE REVIEW

Access to the General Curriculum

Implementation of Individual Education Programs (IEPs) Provision of Non-Academic Services Full Access to the District's Curriculum **Equal Education Opportunity**

THE SUMMIT SCHOOL

There is clear evidence that Summit School is encouraging its students to remain engaged with school, plan for their future, and address persistent behavior and social problems that have interfered with their academic progress previously. Programming is designed with specific student needs in mind, and is consistently delivered, integrating behavior management with academic instruction and practical skills. The Adventure Based Counseling (ABC) program enables students to get beyond the bounds of the classroom to develop appropriate social skills and individual talents by participating in physically demanding outdoor activities, which challenge students and faculty together. Success in those events reinforces a sense of capability which many of these students have not experienced and which, in turn, encourages them to work harder and focus better in academic activities. IEPs are designed to support Summit School students and services are delivered as indicated. However, the observations of the school routines and review of files led to significant concern about the students' access to the general

curriculum and equal education opportunity. Written curriculum was not in evidence in the classrooms, nor were the teachers sure where or what it was. No reference was made to NH Curriculum Frameworks nor were there any lesson plans in evidence. Review of IEPs revealed lack of measurable goals, lack of reporting on progress on goals, and little evidence that complete curricula based on the NH Curriculum Frameworks were available in every class.

LONGVIEW SCHOOL

Observations at the Longview School reveal an energized learning environment that is engaging students in both academic and experiential learning. There is clear evidence of applied curricula in each classroom as well as a connection between hands-on learning and academic standards. Lesson planning is clear and students are taking responsibility for their education. IEPs are developed collaboratively between the sending district and Longview teachers and are viable documents that guide the students work. Peer mentoring for new students provides a sense of belonging as well as support for students new to the Longview program. Related services are provided as needed and are an integral part of the overall program. There is room for improvement in the areas of communicating with parents regarding academic progress and expanding the use of technology and Differentiated Instruction in the academic classroom. Additionally, there is a need for expansion of community access for Longview students.

THE RSEC ACADEMY

The RSEC Academy is working hard to bring individualized instruction and assessment to its students. The use and application of a full curriculum is in evidence, as is the use of multiple methods to assess progress in the general curriculum. RSEC Academy faculty support students as needed yet encourage and reward student initiative and independence. Related services are provided in an integrated manner with academics, thereby increasing the options for access. Communication regarding academic expectations is on-going and assists students with meeting academic goals and in transitioning from grade to grade or subject to subject. Staff and students are clearly working as a unit. IEPs are a valuable tool for teachers and provide a clear guide for academic focus and progress.

SUNRISE CHILDREN'S CENTER

The IEP population at Sunrise Children's Center (SCC) has been reduced over the last couple of years due to local school districts developing their own preschool programs; however, that has not diminished Sunrise's capacity to provide strong preschool programming for its remaining students. SCC is child and family centered and provides an operating schedule and facility that is very supportive of family needs and early childhood development. A dedicated staff takes ownership of its students and delivers appropriately developmental content standards. Because SCC is an integrated preschool, opportunities for children with IEPs to interact with their non-disabled peers are frequent and a natural part of the school day. SCC utilizes the Creative Curriculum and bases its pre-academic work in this curriculum. IEPs are well-suited to each student's needs, but goal writing needs to improve with regard to measurability and noting progress on goals.

Transition

Transition Planning

Process: Provision of Free Appropriate Public Education (FAPE)

Transition Services

THE SUMMIT SCHOOL

Although "transitions" and "transition planning" are an integral part of actual Summit School work, the formal process of Transition needs to be developed further. The requirements for Transition Services and Planning of "The Rules for the Education of children with Disabilities" (NH) and the requirements of IDEA for Transition are not consistently being addressed at Summit. The following activities need to be in place for Transition planning; collaboration between special and regular education staff, measurable post-secondary goals, age-appropriate assessment, services provided in support of post-secondary goals, full course of study, etc. Neither of the two IEPs reviewed for Transition services reflected the required Transition components.

LONGVIEW SCHOOL

Based on the Case Study, Longview School is consistently meeting the Transition requirements of IDEA and "Rules for the Education of Children with Disabilities" and is experiencing success in designing Transition services that continue to engage students and keep them in school while preparing for a post-graduate plan.

THE RSEC ACADEMY

Based on the Case Study, The RSEC Academy is also meeting IDEA and NH RULES requirements for Transition planning and services. Age-appropriate Academy students have access to a variety of vocational and technical programs (through attending Voc/Tech programs at three local area high schools). Age-appropriate middle school students are being introduced to early (age 14) transition services planning. All students at The RSEC Academy are expected to develop and complete a posthigh school plan.

Behavior Strategies and Discipline

ALL RSEC SCHOOLS

All four schools of RSEC have behavior and discipline management standards that are integrated into the overall school operations. The RSEC Academy uses the Positive Behavior and Intervention Supports system (PBIS); its consistent application is evident throughout the building and students demonstrate clear knowledge of its requirements. The other schools have developed similar systems that are consistently implemented. Data are taken and reviewed on a regular basis with appropriate follow up. Students report liking that there is little disruption of the learning environment. Students also report feeling more secure because they have access to the support and caring they need to help address what might otherwise become disruptive behaviors.

SPECIAL EDUCATION POLICIES/ NHDOE BUREAU OF SCHOOL APPROVAL NON-PUBLIC SCHOOL APPLICATION MATERIALS

In addition to the above noted focus areas for the case study presentations, material submitted as part of the application for program approval included: Health/Fire Facility Inspection Reports, the Private School Self Study, Special Education Policies and Procedures, Administrative Policy and Procedures. Current Program Information, and Personnel Roster and Consultant Roster Review and verification of these documents found the RSEC Schools to be in compliance with all applicable New Hampshire Rules and the Education of Students with Disabilities and requirements for Non-Public Approval.

While the "general" RSEC policies and procedures documents are complete and meet full compliance, it is strongly suggested that the following specific information be included in EACH school's respective policies/procedures and/or student or faculty handbook:

ED 1114.05(b) Program Requirements

Written Admissions Policies/Criteria/Procedures to include: description of all admissions criteria; indication of the disabilities of children served by the program; age and sex of children in care; needs, problems, situations or patterns best addressed by the program; criteria for discharge; and preplacement requirements for the child, parent, or placing agency

ED 1114.05(c) Program Requirements

Intake procedures for ALL RSEC schools should include the following statement:"Prior to enrollment, the sending LEA shall send a copy of the child's IEP that meets all the requirements of ED 1109 to each private provider of special education or other non-LEA program."

ED 1114.07(c) Behavioral Interventions

Each RSEC school currently maintains a description of its behavioral interventions. Each description shall include a written statement that the provider of special education does not employ any measure that is aversive or depriving in nature. Actual wording is contained in section ED 1114.07(c) in the NH "Rules for the Education of Children with Disabilities", June 2008.

ED 1114.08 and 09 Emergency Interventions Procedures/Use of Restrictive Behavioral Interventions

Language of ED 1114.08 and 09 regarding Restrictive Behavioral Interventions should be included in EACH SCHOOL'S Emergency Intervention Procedures.

NEW PROGRAMS SEEKING APPROVAL FROM THE NHDOE, BUREAU OF SPECIAL EDUCATION

At the time of the March 26, 27 2012 visit, the facility was not seeking approval for any new programs.

INTRO TO COMMENDATIONS: Based on the observations and direct conversations of the visiting team members with staff and students, the following information is offered as commendations:

COMMENDATIONS

SUNRISE CHILDREN'S CENTER

1. The facility occupied by the Sunrise Children's Center is ideally suited for the work being done and services offered within the program.

2. Staff and administration are entirely dedicated to the work of SCC and reflect real ownership and accountability for the students and the program.

3. There is consistent and timely communication between SCC and Early intervening services and the public school kindergartens.

4. SCC staff is skilled at determining the origins of student behavior and responding accordingly which usually results in diminished negative behaviors.

THE RESC ACADEMY

- The Academy teaching staff is adept at determining methods of assessing the academic progress of their students; a necessary skill as each student reflects multiple learning styles.
- 2. A practice of consistent faculty collaboration results in the integration of academic content and related services. Related services, as delivered, act as a vehicle for the delivery of content to students who need that access.
- 3. The low student/teacher ratio provides on-going opportunities for instruction throughout the school day in a variety of settings and in a consistent manner. Faculty consistently encourages their students toward independence and self-advocacy.
- 4. The communication among faculty and students regarding academic and behavioral expectations results in positive student attitudes and consistent academic effort. The faithful adherence to Positive Behavioral Intervention Strategies (PBIS) contributes as well.
- 5. Access to a wide variety of vocational and technological programs as well as community service provides a range of options for study and preparation for post-secondary plans.

THE SUMMIT SCHOOL

- 1. Programming aspects designed with the unique Summit School student in mind engage students and help to maintain the connection with their education.
- 2. The flexibility and creativity of the staff enable faculty to build sustaining relationships with their students, often for the first time in the students' academic career.
- 3. Behavior management and behavioral support are embedded in The Summit School program. All students and staff know how things work and what to expect; response are consistent and constructive.

LONGVIEW SCHOOL

- The hands-on experiential learning that occurs at the Longview School engages students and helps them commit to their education.
- 2. The school-wide behavior plan is consistent and supportive of positive student behaviors. In turn, the school culture reflects a positive and open relationship among faculty and students.
- 3. A Peer Mentoring program is available for new students at Longview. This helps to engage new students as they enter the program and acclimates them smoothly to the expectations and routine of the school.
- 4. A clear understanding of both the purpose and requirements of Transition Services has resulted in strong, authentic post-secondary plans for many Longview students.

RSEC as the "oversight" agency:

1. The management available through the RSEC administrative structure enables the school directors to attend to the obligations of their respective programs without being responsible for agency management issues.

- 2. Effective communication between the building administrators and the agency director results in adequate budget development and an informed understanding of program operations on the part of the Board of Directors.
- The caring and commitment of the RSEC administration for the programs and personnel of RSEC is evident in the relationships observed. The "agency" knows the RSEC programs inside and out and is effective in supporting them in their important work to the Board.

Number of Cases Reviewed During RSEC March 26, 27, 2012 Compliance Visitation

Preschool	1
Elementary School	0
Middle School	1
High School, Age Below 16	2
High School, Age 16 or Above	3
Number of Noncompliance for Indicator 13	2
Total Number of Case Studies Reviewed	7

FINDINGS OF NONCOMPLIANCE IDENTIFIED AS A RESULT OF THE MARCH 26, 27 2012 CASE STUDY COMPLIANCE REVIEW

Findings of noncompliance are defined as deficiencies that have been identified through the Case Study Compliance Review Process, which are in violation of state and federal special education rules and regulations. Findings of noncompliance may result from review of policies and procedures and related application materials, case study presentations, review of student records or any other program approval activity related to the visit. It is important to note that all findings of noncompliance listed below must be addressed in a corrective action plan and resolved within one year of this report. A template and instructions for such planning will be provided.

Child Specific Findings of Noncompliance to be Addressed by Both the LEA and Private School Setting: Please Note: The NH Department of Education, Bureau of Special Education requires that Child Specific Findings of Noncompliance be addressed and resolved within 45 days of notification.

SUNRISE CHILDREN'S CENTER

ED 1109.01(a)/34CFR 300.320 Elements of an IEP

District: Mont Vernon. One out of one IEP did not contain measurable goals

THE SUMMIT SCHOOL

ED 1109.01(a)/34CFR 300.320 Elements of an IEP

District: Merrimack. One out of two IEPs did not contain measurable goals

ED 1114.05(g)/34CFR300.320 Access to equal educational opportunities

Districts: Merrimack, Wilton. Two out of two IEPs did not reflect access to the general

curriculum

ED 1109.01(a)/34CFR 300.320 Transition Services

Districts: Merrimack, Wilton. Two out of two IEPs were out of compliance with Indicator #13:

- Collaboration between regular and special education
- Measurable post-secondary goals (one IEP)
- Post-secondary goals based on age-appropriate assessment
- Services needed to assist student in meeting post-secondary goals
- Courses of study (one IEP)
- Evidence that the student was invited to attend the Transition meeting
- Evidence of parent consent to include an outside agency in Transition meeting (one IEP)

Systemic Findings of Noncompliance to Be Addressed by the Private School Setting

Please Note: The NH Department of Education, Bureau of Special Education requires that Systemic Findings of Noncompliance be addressed in a corrective action plan and met within one year of the date of the report; a template and instructions for such planning will be provided.

Lack of evidence of compliance with Indicator #13

ED 1113.02(b) Vocation assessments 34CFR 300.320(c) Rights that transfer at the age of majority

SUGGESTIONS FOR PROGRAM-WIDE IMPROVEMENT

Suggestions for improvement, simply stated, are recommendations provided by the visiting team that are intended to strengthen and enhance programs, services, instruction and professional development, and the NHDOE strongly encourages that serious consideration be given to the suggestions. However, discretion may be used in this area; suggestions for improvement are not considered to be required corrective actions and you may determine which suggestions most warrant follow up and address those in your corrective action plan. System wide suggestions for improvement are listed below. It

should be noted that, in the Building Level Data Summary Report on the following pages, any suggestion made by a visiting team member that is actually a finding of noncompliance, has an asterisk (*) before it, and it is also listed above with the findings of noncompliance.

SUNRISE CHILDREN'S CENTER

- 1. Improve goal-writing skills, especially with regard to writing measurable annual IEP goals.
- 2. Review curriculum and developmental standards to assure common understanding and implications for connection to Common Core Standards (public schools).
- 3. Explore ways to increase communication between Related Services providers and parents.
- 4. Consider offering Professional Development opportunities in Differentiated Instruction for teaching staff and in mental health issues for pre-school children for all staff as appropriate.
- 5. Explore ways to improve communications in support of student needs between SCC and sending school districts.

THE RSEC ACADEMY

- 1. Continue to "refine" curriculum maps and align to Common Core Standards.
- 2. Continue to expand the application of technology into instruction, curriculum, research, etc.

THE SUMMIT SCHOOL

- 1. Continue formal Professional Development in writing IEPs: measurable goals, present levels of performance, objectives or benchmarks, accommodations and modifications, etc.
- 2. * Continue formal Professional Development in writing Transition Plans: measurable post-secondary goals, needed Transition services, use of age-appropriate assessment, etc.
- 3. * Work to increase the engagement of sending school districts in the development of IEPs that are compliant with ED 1109.01 and 34CFR 300.320.
- 4. * Engage The Summit School teaching staff in the development of a full high school curriculum required for diploma-granting schools. This work should begin by focusing on the Common Core Standards and include "power standards", assessment procedures, both formative and summative, materials, activities, and high school competencies as required by the NHDOE.
- 5. Work with the representatives of your sending school districts to assure that The Summit School receives copies of ALL documentation necessary to establish their students are receiving FAPE and full access to the general curriculum (parent signatures, minutes of meetings, evaluations/re-evaluations, Transition documents, etc).
- 6. Establish a clear process that will provide evidence (or lack of) student progress on IEP goals, including a process for revising (with the sending LEA) IEPs as necessary.

LONGVIEW SCHOOL

- 1. Increase/improve communication with parents regarding students' academic progress.
- 2. Increase access to and the use of technology for classroom instruction, lessons, research, presentations, etc.
- 3. Explore options for additional community access and Extended Learning Opportunities: Community Service, internships, work-study, etc.

4. Assure that the Longview School is offering all course work required of a diploma-granting school and that high school competencies are in place and aligned with the curriculum.

RSEC (Agency)

Although the schools of RSEC are separate and unique, there are common elements that need to be in place. It is suggested that the "central" administration of the RSEC take a more assertive role in the following activities:

- 1. Development of a common curriculum in connection with the Common Core Standards that meets all of the requirements of diploma-granting schools.
- 2. Development of high school Competencies that complement the curriculum and that are woven into the assessment practices of each of the high school programs.
- 3. Work with the Board of Directors to bring up-to-date the technology offerings at each school, appropriate for the age range and academic expectations of each school. Develop a long term technology plan to address hardware, software, professional development and integration of technology into the curriculum.
- 4. Engage the school directors/principals in assessing their current textbooks and other instructional materials to determine whether they need to be replaced or expanded.
- 5. Assist in arranging for professional development activities that will be in common for all of the schools: writing measurable goals, developing Indicator #13-compliant Transition Plans, etc.
- Facilitate opportunities for program directors/principals to communicate with each other on a
 regular basis around common issues and concerns to help increase consistency among the
 RSEC programs.

Access Strengths	Access Suggestions for Improvement
1. Multiple student needs are addressed by individualized programming and direct instructional support.	1.* Although there was some evidence of well-constructed IEPs, more work needs to be done to improve IEP development the following areas:
2. All staff are committed to their respective students and programs; staff go the extra mile to support and engage their students.	 Measurable goals Measurable post-secondary goals Present level of performance
3. Small class sizes allow students to feel safe and therefore willing to engage in learning in ways they previously did not.	Meeting requirements of NHDOE Indicator # 13 (as applicable)
4. Integrated curriculum projects provide strong foundational learning as well as scaffolding for future learning.	2. Increased oversight by RSEC administration would assure consistency in developing ED 1109.01-compliant IEPs as well as providing peer mentoring in this practice.
5. Hands-on learning is employed throughout the RSEC schools.	3. Work in curriculum development, in particular aligning with Common Core Standards, needs to continue and result in a common,
6. Student achievement, either academic or social cinoriola, is recognized and celebrated by RSEC staff.	agreed upon, and consistently impremised confident the RSEC schools.
	4. I echnology was evident in minical assumed and Students would likely benefit from an RSEC-wide, long term Technology Plan that would address budget planning, instructional applications, and timely replacement of older equipment.
	5. It is suggested that RSEC administration and staff explore ways to increase parent communication focusing on student progress and IEP development.

Is (are) an annual goal(s) included in the IEP that is/are related to the student's transition services needs? • If yes, then check Y OR if no, then check N				
T11.) Is there evidence that the student was invited to the IEP Team meeting where transition services were discussed?	_		2	
For the current year, is there documented evidence in the IEP or cumulative folder that the student was invited to attend the IEP Team meeting? If yes, then check Y OR if no, then check N			3	65
	YES	Q Q	N/A	
	2	1		
For the current year, is there evidence in the IEP that representatives of any of the following agencies/services were invited to participate in the IEP development including but not limited to: postsecondary education, vocational education, integrated employment (including supported employment), continuing and adult education, adult services, independent living or community participation for this post-secondary goal? Was consent obtained from the parent (or student, for a student the age of majority)? If yes to both, then check Y If no invitation is evident and a participating agency is likely to be responsible for providing or paying for transition services and there was consent to invite them to the IEP meeting, then check N If it is too early to determine if the student will need outside agency involvement, or no agency is likely to provide or pay for transition services, check NA If parent or individual student consent (when appropriate) was not provided, check NA				
T13.) Does the IEP meet the requirements of Indicator 13? (Check one) Yes (all Ys or NAs for each item (1 8) on the Checklist or No (one or more Ns checked)	-	2		100
T14.) Student is informed prior to age 17 of his/her rights under IDEA	3			6-7(6)

Transition Suggestions for Improvement	1.* Although there was some evidence of good Transition planning, professional development needs to occur so that all staff responsible for writing Transition Plans are developing them in a way that is supportive of students preparing to leave high school. 2. RSEC schools that are serving high school students are encouraged to begin career mapping in a timely manner for all students and to assist students in developing post-graduation plans.	3. For those students who would benefit from such a practice, RSEC staff is urged to explore additional community resources for career planning.	
Transition Strengths	 There was clear evidence of RSEC faculty working hard to integrate new students in to their new placements and to help them feel welcome and supported. RSEC students are fortunate in that several options for vocational/technology programming are available for them. Serious thought and deliberate planning goes into making those placement decisions.

Access Strengths	Access Suggestions for Improvement
1. Flexibility in the schedule for service delivery	1.* Provide professional development in goal writing (measurable goals) for IEPs is recommended for SCC staff
2. Child and family centered3. SCC provides early childhood programs with developmentally appropriate activities	2. Staff review of curriculum and developmental content standards in alignment with Common Core standards is recommended
4. SCC programs extend through 51 weeks/year, providing access to programming through extended day and extended year services as required by IEPs	 Investigate the "Ages and Stages Questionnaire" for screening children at risk Investigate ways for part-time related services staff to increase parent communication regarding home strategies for carryover of skills
5. SCC facility offers adequate and age-appropriate space and facilities 6. Generous parents have provided a handicapped-accessible playground	5. Provide professional development in Differentiated Instruction to support all learners
7. Staff and administration are dedicated and show ownership for the program and students
